

Automated Web Testing in Java with Playwright

Introducing Playwright

Andrejs Doronins

Automated Web Testing in Java with Playwright

Version Check

Version Check

This course was created by using:

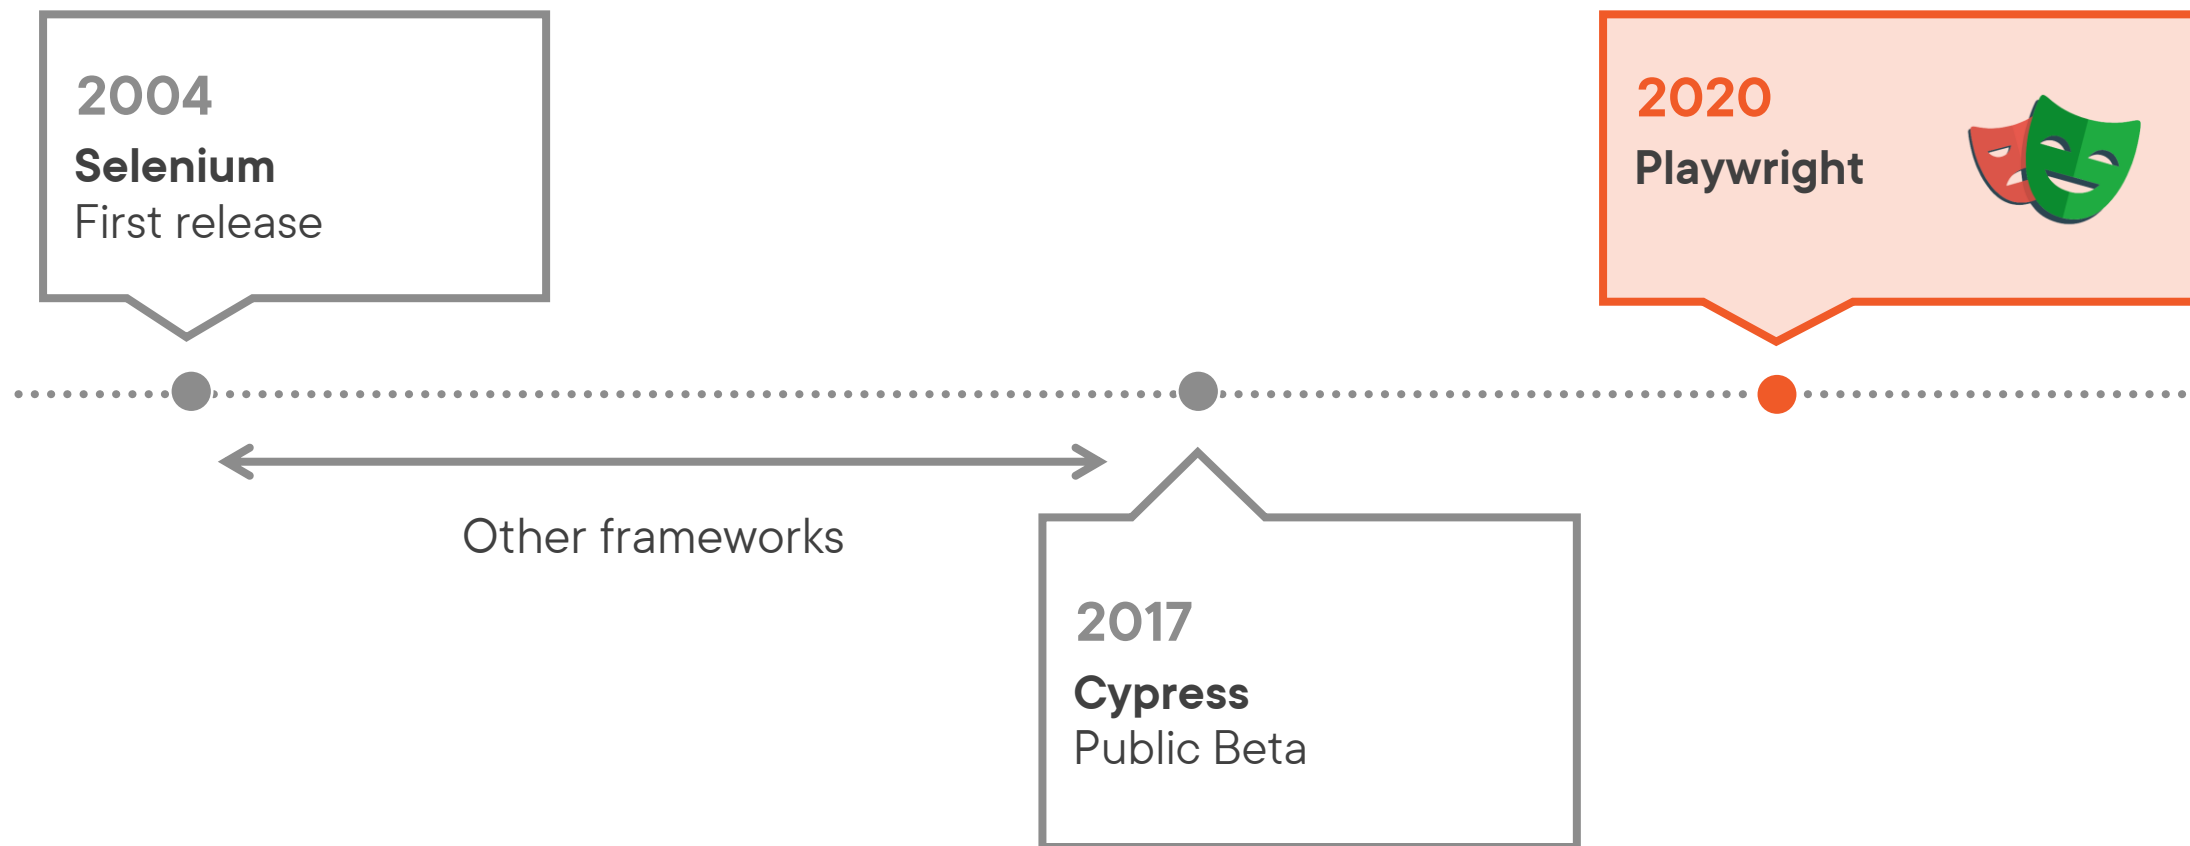

- Playwright 1.14.1

Version Check

This course is 100% applicable to:

- Playwright 1.14.1

Selenium

Pros:

- Widespread
- Multiple language bindings

Cons:

- Tests inherently flaky
- Slow release cycle

Cypress

Pros:

- Modern
- A lot of functionality

Cons:

- JavaScript only
- Important trade-offs:
<https://docs.cypress.io/guides/references/trade-offs>

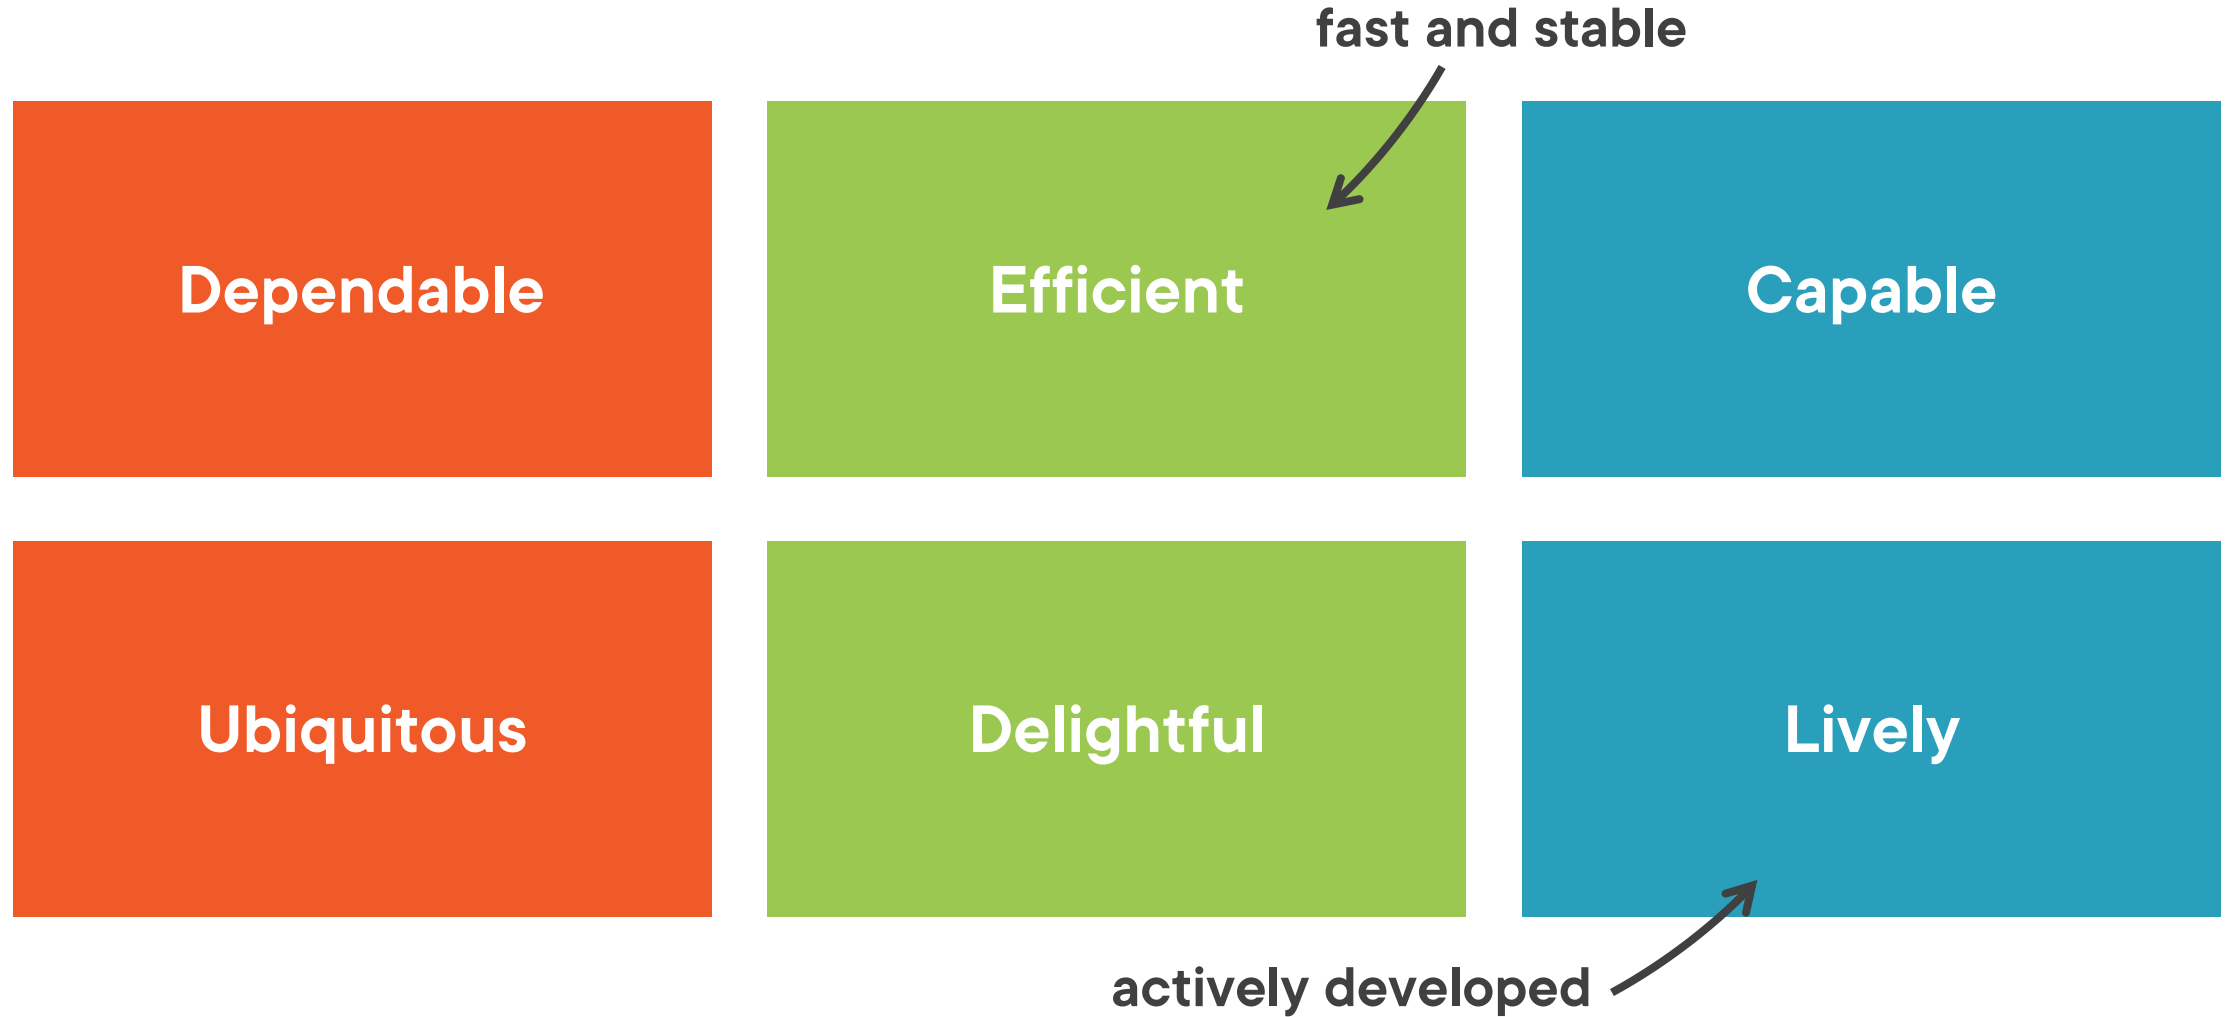

Playwright

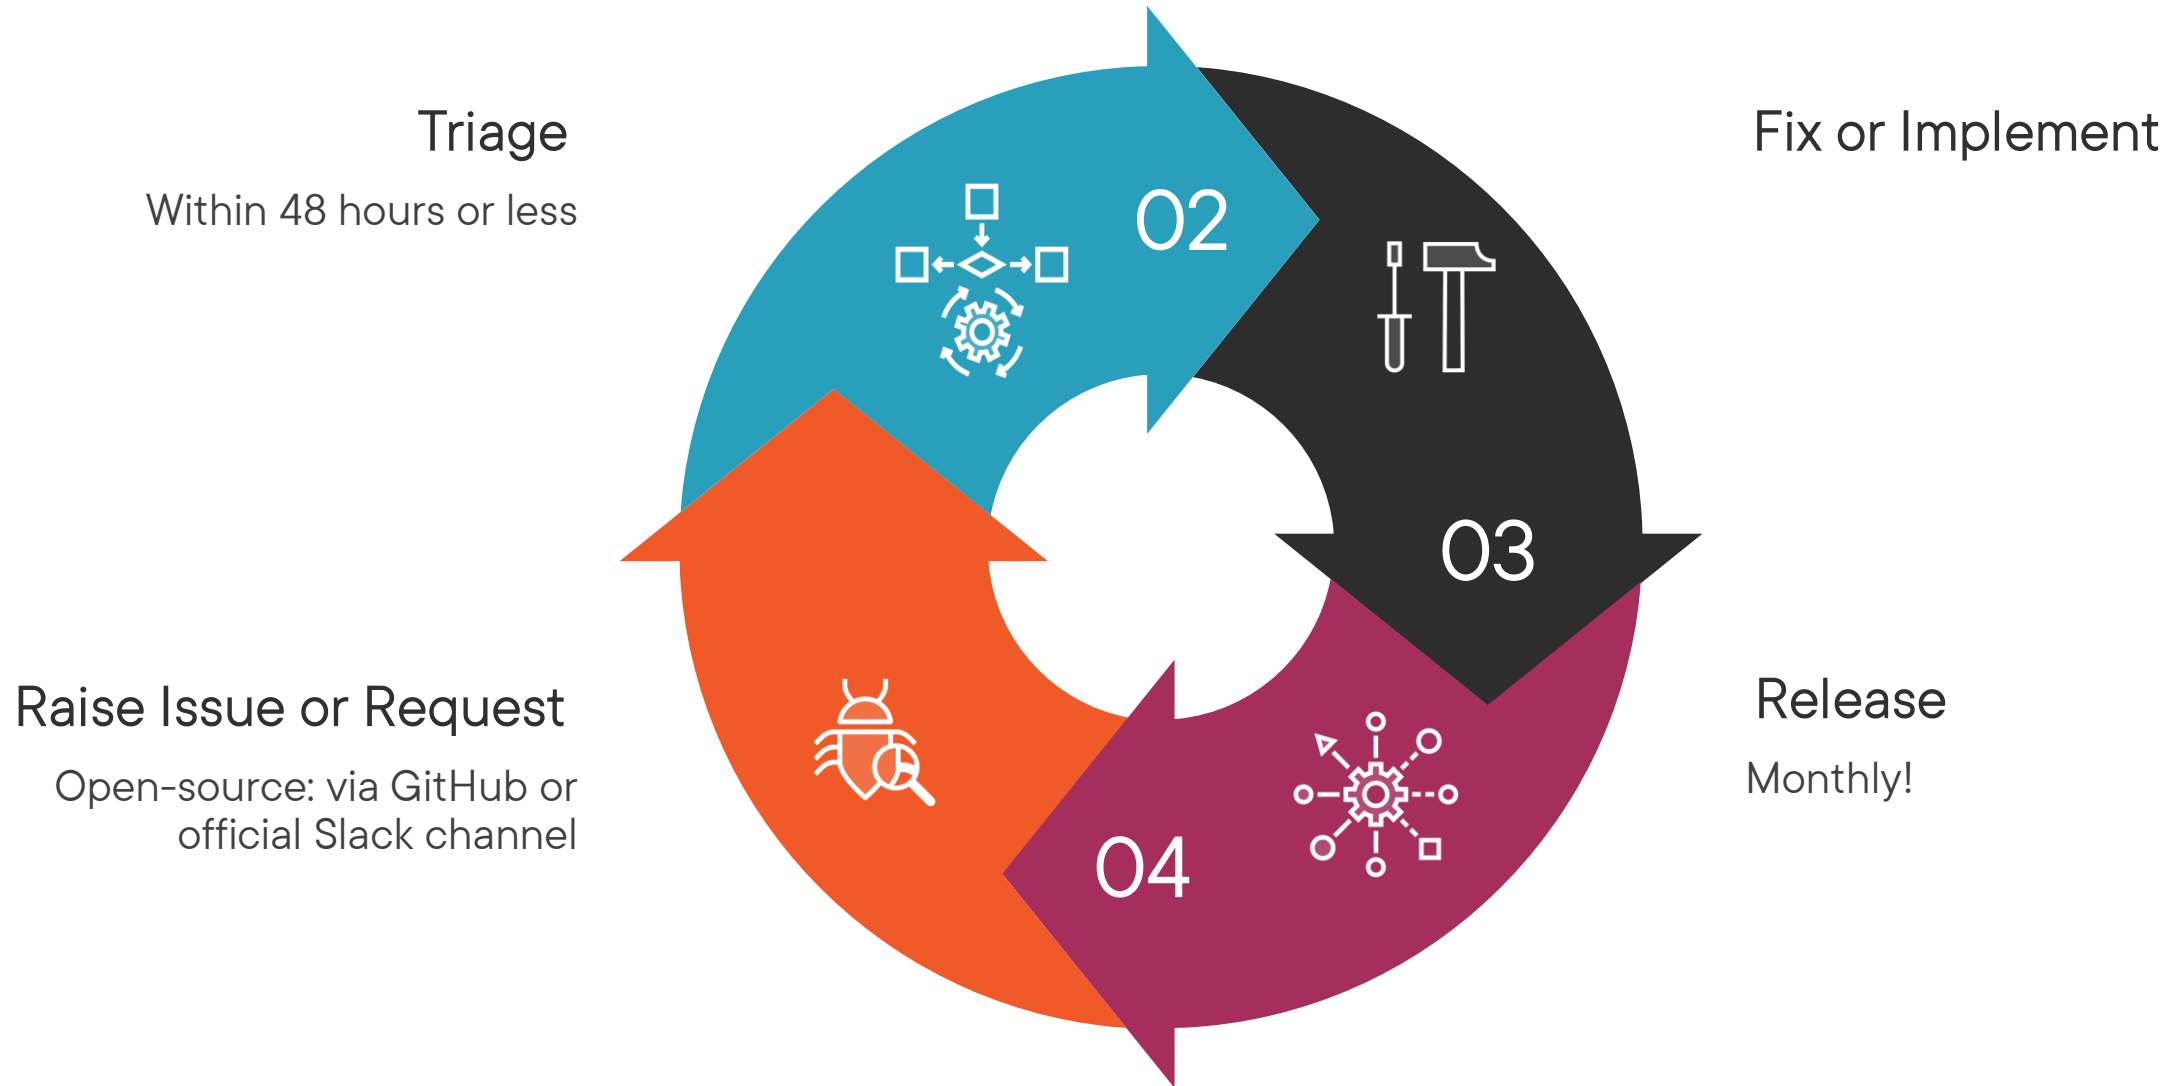

Pros:

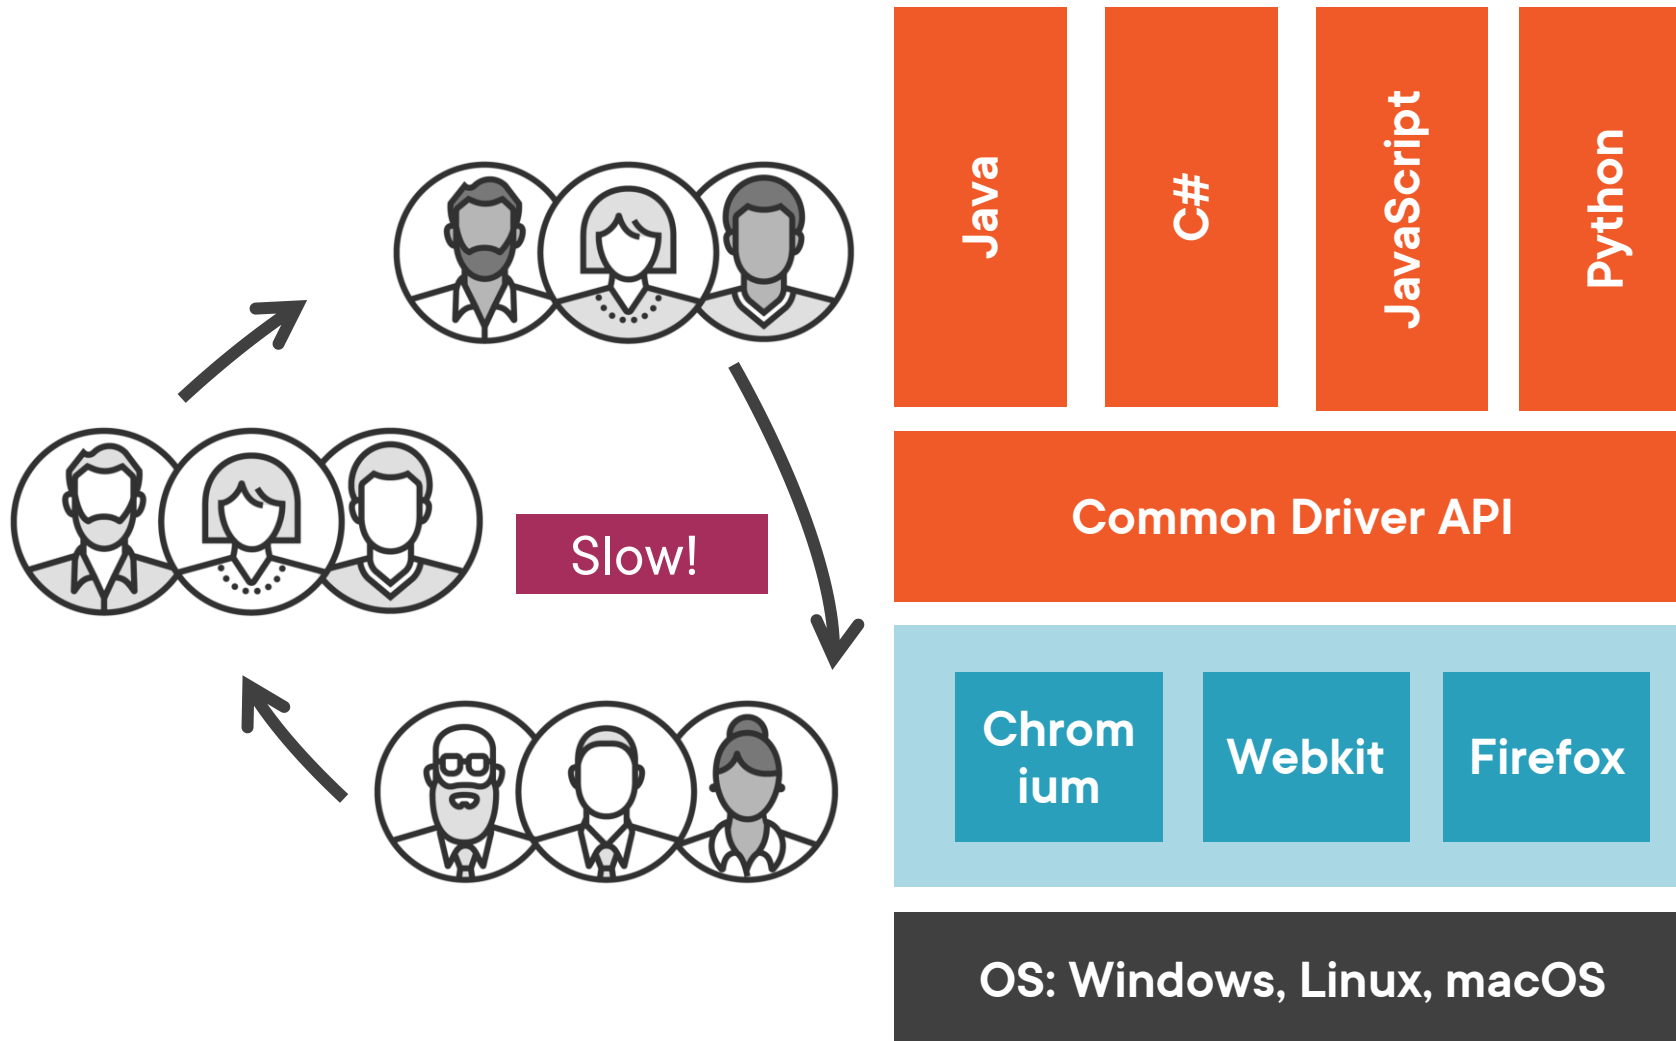

- Backed by Microsoft
- Multiple language bindings
- In-built stabilization mechanisms
- Support for network API
- Comes with great tooling

Why Playwright?

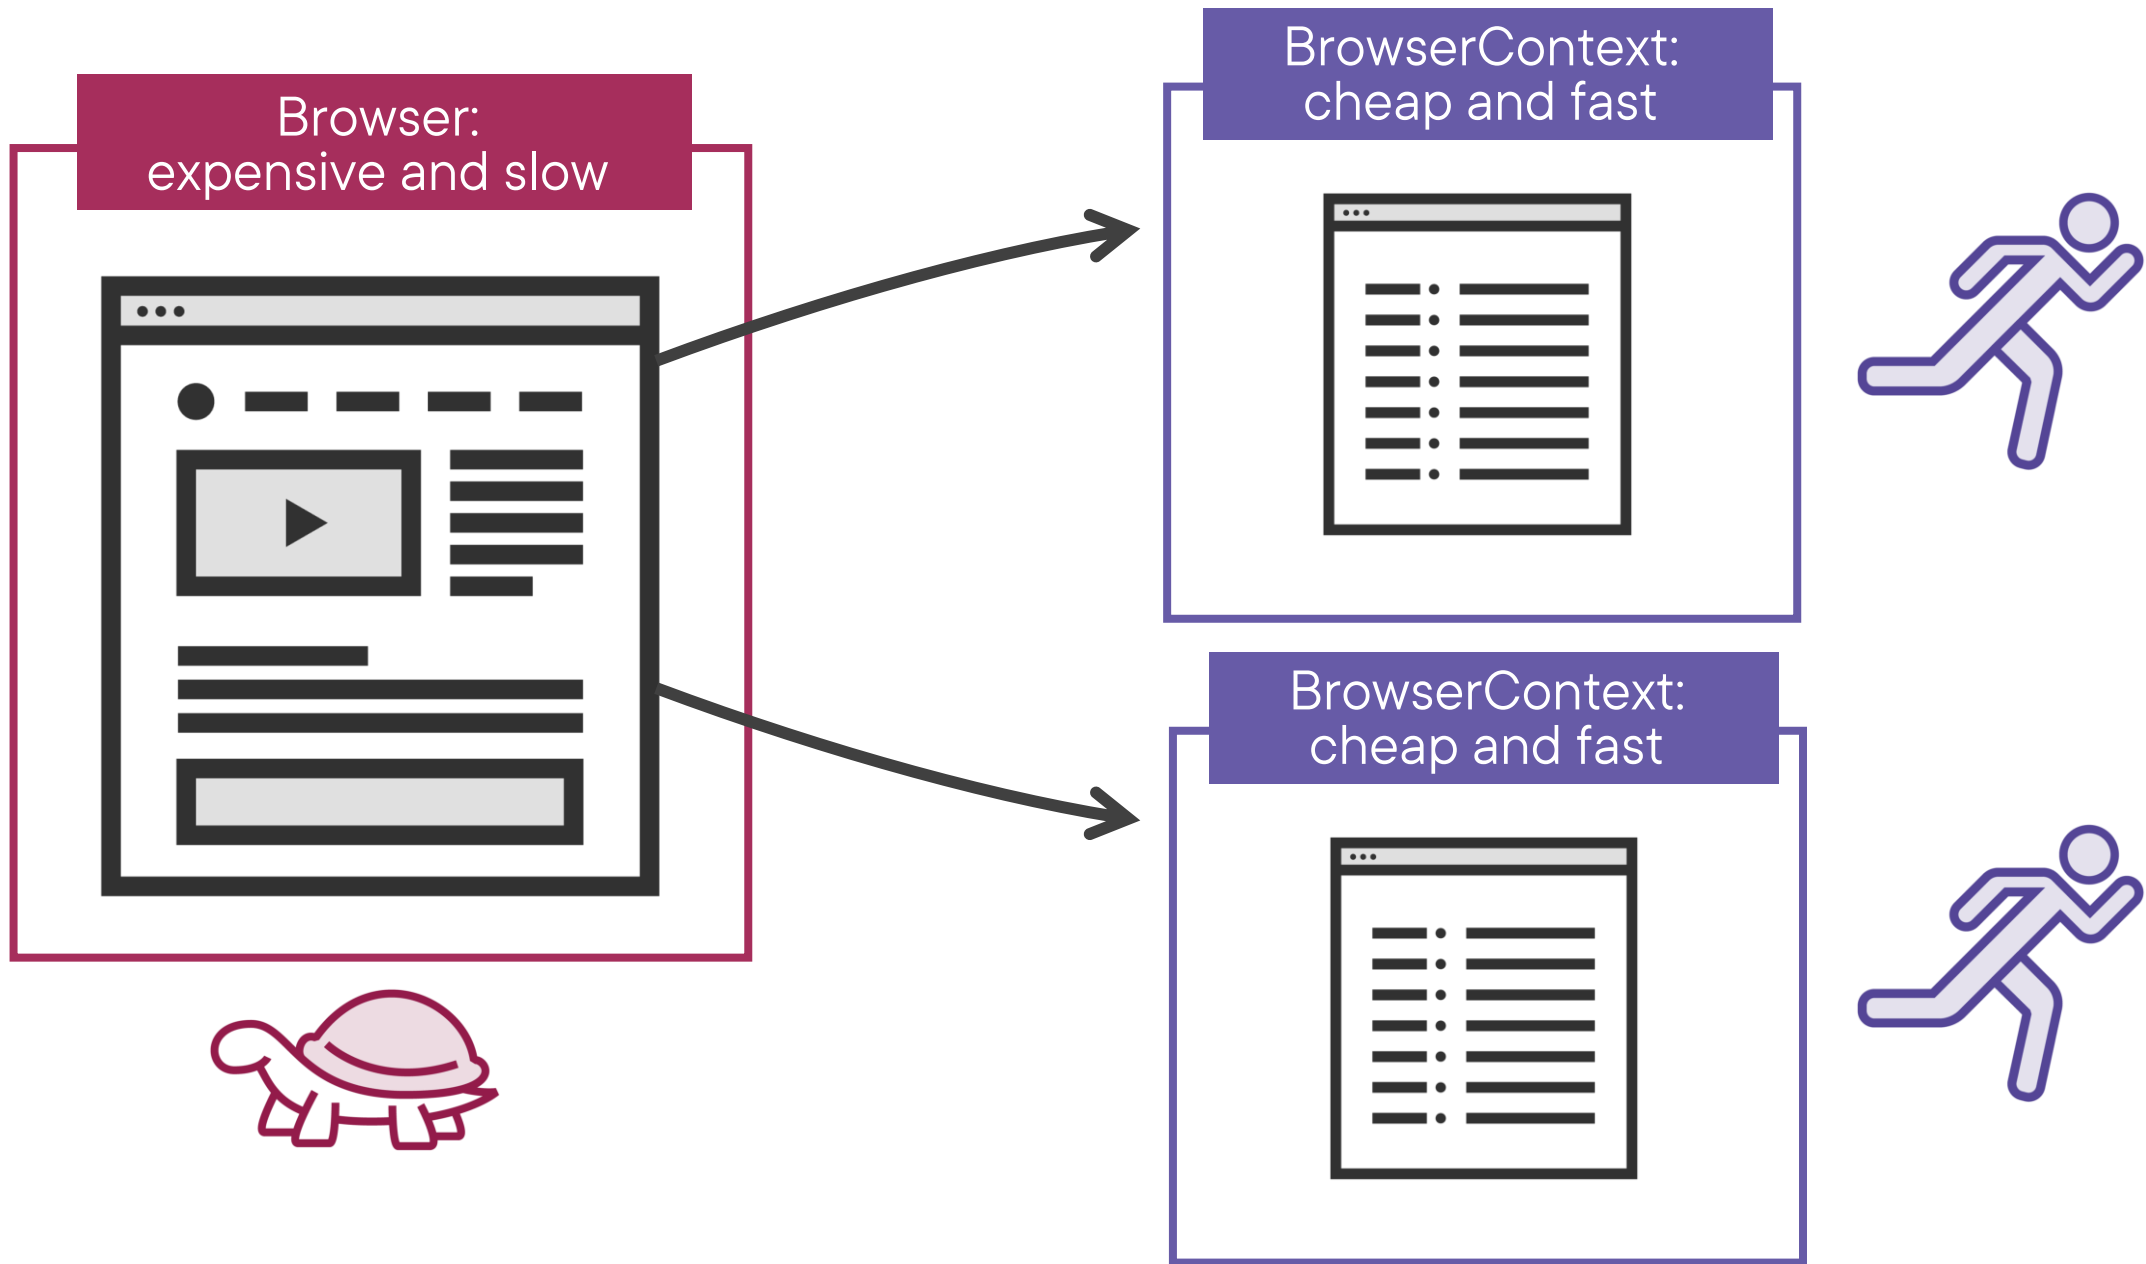

Dependable

Playwright: one team!

```
element.click();
```

```
if(isVisible(el) && !isDisabled(el)) {  
    try {  
        waitSeconds(5);  
        el.click();  
    } catch(Exception1 | Exception2 e) {  
        // handle  
    }  
}
```

Clicking, typing

Selectors

Device emulation

Geolocation, locale

Screenshots, videos

Network Activity

Ubiquitous

All major OSs:

- Linux, Mac, Windows

All major browsers:

- Chrome, Firefox, Safari (Webkit)

Many popular languages:

- JavaScript/TypeScript, Java, C#, Python

Full CI support

Long-term serious project
backed by Microsoft

Prerequisites

Experience with

- Java (1+ years of experience)
- IDE
- Writing any kind of automated tests

Nice to have:

- Java 8 lambdas
- HTML basics

Recommended Java Courses

Java Language Fundamentals Path (Beginner section)

Setting up a Java Development Environment

Getting Started with Programming in Java

Introduction to Testing in Java

```
<form>  
  <div class="form-group">  
    <label for="nameInput">Name</label>  
    <input class="form-control" id="nameInput" placeholder="John">  
  </div>  
  <button type="submit" class="btn btn-primary">Submit</button>  
</form>
```

Tag

Attribute

```
page.click("button");
```

Tech Stack

Windows

Java 11 (LTS)

- Min. Java 8 or later required

IntelliJ

JUnit 5

Maven

Playwright

BrowserType

Browser

page.click();

Demo Sites

For simpler scenarios:

- Local static HTML page

For complex scenarios and network demo:

- GitHub and other public sites

Content applicable to any site

Course Overview

Selectors

Core Playwright interfaces

Write and refactor first test scripts

Simple actions: clicking, typing, selecting...

Advanced actions: handling dialogs, downloads, screenshots, etc.

Configuring tests globally

Network: below the surface

Playwright Tooling
